Dragon Dictate Medical for Mac

Manage your medical world by voice

Medical professionals on the Mac® platform have a fast and easy way to transcribe their appointment and medical record notes directly into the world's most popular EHR systems and other applications immediately, with virtually no spelling errors.

Turning voice into text up to three times faster than most clinicians type with accuracy up to 99% out of the box, using Dragon® Dictate® Medical for Mac means clinicians can spend more time with patients, improving patient satisfaction, practice volume and profitability.

System requirements

- CPU: Intel®-based Mac computer (2.2 Ghz Intel Core™2 Duo processor or greater recommended)
- Free hard disk space: 7GB
- Minimum Operating Systems: Mac OS® X Lion (10.7) or OS X® Mountain Lion (10.8)
- RAM: 4GB recommended
- A DVD-ROM drive for installation
- A Nuance®-approved noise-canceling headset microphone for Mac (included in purchase)

Note: An Internet connection is required for automatic product activation (a quick anonymous process)

Benefits

Increase your productivity with accuracy up to 99% out of the box. Medical professionals spend less time editing using Dragon Dictate Medical for Mac's easy proofing tools and powerful correction interface. Plus Dragon Dictate Medical for Mac adapts to a clinician's voice and words used to deliver better recognition results over time.

Improve your practice with higher levels of reimbursement and more complete, accurate documentation which improves coding effectiveness and provides richer detail per patient. With reduced time spent on documentation, practice volume and profitability increases.

Dragon speaks your language with more than 90 medical specialties and subspecialties, ensuring proper clinical documentation. Dragon Dictate Medical for Mac uses the most advanced speech recognition technology, a brand new speech engine, and sophisticated medical acoustic models and language models to understand the terminology used by medical professionals.

Dragon works just for you, anywhere with its personalized custom vocabulary words and commands option so that dictated text looks the way it should, every time. With support for wideband Bluetooth® wireless microphone or digital voice recording with transcription, clinicians can eliminate transcription services and not be tied to a desk.

Features

EHR Support: More complete, accurate documentation improves coding effectiveness and provides richer detail per patient, giving clinicians greater confidence to code at higher levels than with an EHR system alone.

Acoustic Models: Ensures proper clinical documentation which allows physicians to dictate in their own words, generating "once and done" documentation.

Specialized Medical Vocabularies: More than 90 medical specialties, which means that you won't encounter missing terms or phrases – they all there "out of the box."

Free-Text Dictation: Supports more detailed History of Present Illness, more flexible Review of Symptoms, and more descriptive Assessment and Plan.

Vocabulary Editor: Set alternative written forms of words or phrases (e.g. orthopedic vs. orthopaedic).

Regional Accent Support: In addition to US and UK English, it supports many regional accents of non-native English speakers (such as Indian, Latino, or Southeast Asian), and other accents (such as Australian or American - Southern).

Faster, More Advanced Correction: Simply speak to correct individual words or phrases through a single, easy to understand window and select an alternate word choice, or spell and train new words.

Transcription of Recorded Speech: Busy clinicians on-the-go can easily transcribe recorded speech audio files into text. No need to outsource transcription!

Secure Patient Information: Supports HIPPA confidentiality requirements.

And many more…

Dragon Dictate Medical for Mac allows clinicians to speech-enable their practice's medical records for faster, more efficient and profitable clinical documentation. Dictate faster and more accurately than ever before, dramatically reduce or eliminate transcription costs, save time every day and spend it with patients, and support a higher level of reimbursement for the practice using Dragon Dictate Medical for Mac.
